

## How to Make a Reference Guide

Follow the directions below in order to make a flip chart style reference guide for Piaget's Theory of Cognitive Development.

1. Get five sheets of paper.
2. Staple one of the short edges so that the papers are bound at one end but can be flipped through easily.
3. Measure and cut each layer so the layer underneath is **sticking out 1"**.
4. Label the front cover **Jean Piaget's Cognitive Development Theory**.
5. Write your name in the lower left hand corner of the first page.
6. Label the first tab (page 2) **Sensorimotor Stage (0-2)**
7. Label the second tab **Preoperational stage (2-7)**
8. Label the third tab **Concrete-Operational Stage (7-11)**
9. Label the final tab **Formal Operational Stage (11-adult)**
10. On each page paste a picture of you at that particular stage of development AND draw two pictures of something you were interested at that time of your life.
11. Briefly describe each stage \*(Be sure to include examples of key terms – i.e. egocentrism)
